

## Application Engineer

**Job Title** : Application Engineer

**Grade** : Management Trainee – 1

**Location** : Mumbai/Bangalore/Hyderabad

**Qualification** : B. Tech - Computer Science/IT

**CTC** : 18.10 LPA (Fixed: 14 LPA + Joining Bonus: 2 L + Variable: 2.10 LPA)

### **Job Purpose:**

- With the vision of creating the best bank right here in India, one that is technology-led, we embark on our journey from a legacy platform approach to a micro-services platform.
- As part of this journey, we are looking out for Application Engineers across our platforms/modules/systems/applications who could cater to our internal banking business requirements. The role is required to deliver on the technical requirements for their allocated domain in terms of engineering.
- If our vision; the above description and the opportunity to manage technology banking needs across domains are some of the things that get you excited – trust me, we're more excited to get to know you.
- This role acts as a technical expert for the Technology Org. for that domain.

### **Roles & Responsibilities:**

- The role will manage the technology development needs of their assigned platform/module/application.
- The bank currently uses multiple platforms/applications to cater to our diverse banking needs across units; and you will be responsible for the technical delivery of the ones assigned to you.
- You will be working in an AGILE environment for delivery.
- Some prevalent technologies and concepts within the Tech team's work are - Golang, microservices, data engineering, API, Kubernetes, DevOps, Docker, Ansible, Chef, Terraform, SaaS/IaaS platforms.
- Ensure program milestones are achieved in the given timelines to avoid misalignment.
- Work closely in a highly AGILE environment with a team of engineers, delivery managers and vendors
- The success of this role is to ensure product evolution and include your features in ongoing releases.
- You will be given proper training before you are immersed in any domain/application.
